## A

### Abrasion

Wearing away of enamel on teeth. This may be caused by normal grinding, friction or incorrect brushing of teeth.

### Abutments

Attachments on the ends of a bridge, which are cemented to the natural teeth; a tooth used for support or anchorage of a fixed or removable prosthesis.

### Accelerated death benefit

A rider that provides early access to life insurance benefits in case of a terminal illness. "Living benefits" are paid to the insured for medical expenses before death. Benefits paid decrease the benefit payable to beneficiaries after the insured's death.

### Accidental death benefit rider

An additional cash benefit paid in addition to other benefits when a death is a result of an accident.

### Accumulation period

Length of time an individual has to incur covered expenses to satisfy a required deductible and/or calendar year or plan year maximum.

### Actively at work provision

Life insurance coverage is not available to employees who are not actively at work on the effective date of the employer's contract with Humana; employees are covered when they return to work.

### Age In

When a retiree or eligible dependent becomes Medicare eligible - usually after turning 65 - and is eligible to enroll in the group sponsored Medicare Advantage plan.

### Alveolectomy

Removal of excessive bone and soft tissues, usually done to enhance the fit or appearance of an artificial denture.
